

## **INFORMATION**

As part of an experimental project granted to the MRC of Bonaventure by the Ministère de l'Agriculture, des Pêcheries et de l'Alimentation (MAPAQ) concerning the elaboration of a development plan of the agricultural zone, the MRC advises the population that a field inventory will be performed during the summer season.

An agricultural engineer, under the supervision of the project manager, will be mandated to draw a portrait of the lots, giving a complete description in the agricultural zone of the territory.

As per her mandate, this person will visit each property to make a short description of the plant cover. Your collaboration in allowing this person to visit would be appreciated. The success of this project will benefit the whole community of the territory of the MRC of Bonaventure.

We thank you in advance for your comprehension.
